

what do our customers think?

"From the initial work they undertook, to existing, ongoing projects, we have been extremely pleased with Micropoint's advice, work ethic and overall willingness to achieve demonstrable results within clearly defined timescales. We will have no hesitation in offering Micropoint additional projects, when they are required, or recommending them to other organisations."

IT Manager, Nationwide Retailer

"Due to the increase in student numbers we had outgrown the existing computing facilities. A new computer area was designated and Micropoint were asked to upgrade our servers, install new sockets, cabling and cabinets. In addition wireless services were introduced with over 40 access points installed. I was very pleased with Micropoint's attention to detail, helpful advice along the way and ongoing support."

Head of I.T. A well known London College

"By teaming up with Micropoint it has been possible to benefit from their expertise in all areas, identify weaknesses in the organisation's infrastructure and ensure they are addressed. Since bringing in Micropoint there has been a noticeable improvement in the management of the network and the reliability of the e-mail system. Perhaps the most important factor is that we know that when issues arise the relevant expertise is available to deal with problems or new demands quickly and efficiently."

Information Systems Manager, International Scientific Body

"Our organisation is highly committed to ensuring that we deliver real value for money for expenditure within IT. Our network structure required updating to keep pace with the growth of our business. This included up-grading all server platforms, vastly improved security, application and patch management via SMS and better remote communications for our field staff. Micropoint at the outset provided a technical specification which was clearly explained along with a cost justification summary. This enabled us to authorise the project which was completed on time and to budget."

IT Manager, Major UK Charity

"I have been particularly pleased with Micropoint's flexible approach and the way their team has responded positively to our suggestions in order to meet the Trust's precise requirements. Micropoint has extensive technical knowledge and will be providing ongoing checks and updates."

IT Manager, NHS Primary Care Trust

"Our distributed offices dealing with a high degree of network traffic had produced some performance issues which were not acceptable. Because of this we sought out companies to approach with a strong technical ability, who were vendor independent and understood our industry. Micropoint Systems were recommended to us and successfully implemented the change to a high speed switch based network with extremely cost effective wide area communication. This incorporated server upgrades, anti virus, anti spam and VPN services which made a positive impact on our business."

Practice Manager, Established Legal Firm

"With reference to the work carried out by Micropoint on our server, network and desktop infrastructure, I would like to thank you for the smooth and professional manner in which the project was carried out. The service provided by Micropoint was of a very high standard at all times with respect to duty of care, expertise and integration with our IT strategy. Micropoint were an extremely pleasant company to work with, and both I and the management are very satisfied with the standard of work carried out."

IT Administrator, International Charity

"Following a long term relationship with Micropoint who have advised, implemented and supported our computer network for several years, we had no hesitation in appointing Micropoint to Project Manage and deliver the solution for our merger with another association."

IT Director, Housing Association
